Chronology :

In December 2020, MBAG launched initial investigations based on a voluntary declaration of a supplier regarding a potential deviation in their production process. The identification of the possibly affected parts showed that such parts were delivered to several Mercedes-Benz assembly plants. In order to rework all

potentially affected vehicles plant actions were initiated.
In January 2021, further analysis were started to determine the possible consequences of the suspect parts in a vehicle environment.
On March 26, 2021, MBAG determined that a potential safety risk cannot be ruled out and decided to implement a recall for the affected vehicles.

Description of Remedy :

Description of Remedy Program : An authorized Mercedes-Benz dealer will replace the seat position switches on the affected vehicles.

Pursuant to 49 C.F.R. § 577.11(e), MBUSA does not plan to provide notice about pre-notice reimbursement to owners since none of the involved vehicles would have been previously subject to the condition described and all remain covered under the new vehicle warranty.

How Remedy Component Differs from Recalled Component : Seat position switch according to specifications. Hall Sensor - A2059051803

Identify How/When Recall Condition was Corrected in Production : A change in the production procedure of our supplier ensures that this issue can no longer occur from Feb 3, 2021 onwards.
