Chronology :

On 5/11/2021 During a review of the monthly GM report for April it was reported that the dining chairs installed in certain vehicles needed to have reinforcement to stabilize the legs on the chair. The vendor Allure supplying the chairs provided documentation for repair.

On 5/12/2021 Forest River's Office of Corporate Compliance (OCC) began researching. After speaking with the manufacturing plant Columbus, it was determined that no complaint or claim had been received that had caused an injury.

On 5/14/2021 Forest River's Corporate Recall Committee voted this to a Technical Service Bulletin (TSB) with a caveat that any complaint of injury caused by the chair failing, OCC will inform the committee to move to recall.

On 5/17/2021 Forest River's Office of Corporate Compliance (OCC) received a complaint of injury. The legs did detach while an occupant was in the chair.

On 5/18/2021 Forest River's Office of Corporate Compliance (OCC) alerted the Corporate Recall Committee of the injury complaint and moved to file a recall.

On 5/20/2021 Filed 573 with NHTSA, sent Notice of Defect to Transport Canada

Description of Remedy :

Description of Remedy Program : Forest River will provide all parts and labor at no charge to the consumer and dealer. An authorized Forest River Dealer or Service Center will need to perform the repairs to add a top mending plate and a bottom 90° angle installed to the four legs. This will reinforce them so there is not a potential for the legs to detach from the rest of the chair body.
