Chronology :

April 27, 2021, Porsche was informed that due to an incorrect parts list, the subject vehicles were assembled with passenger seat variants that are not approved.

Porsche analyzed whether the incorrect assembly combination may have a potential influence on the Occupant Classification System. In addition, the technical relationship between certain seat cover materials and particular occupants was investigated.

June 16, 2021, after receiving test results showing a potential for Occupant Classification System malfunction, and out of abundance of caution, Porsche decided to recall the affected vehicles.

Description of Remedy :

Description of Remedy Program : The vehicles will be recalled to the workshop and the approved seat occupant components will be installed free of charge. There are no plans for reimbursing the owners as all affected vehicles are still covered under warranty.

How Remedy Component Differs from Recalled Component : Not applicable

Identify How/When Recall Condition was Corrected in Production : The recall condition was corrected in production beginning April 22, 2021.
