TO: All U.S. Black Series Camper Inc. Dealers

SUBJECT: Safety Recall 21V116

Certain models have Curt part 52041 and 52044 breakaway kits with batteries that can become depleted, which can lead to an overload on the main battery

REF: Safety Recall 21V116

Certain models of C12, C13, C15, HQ12, HQ15, HQ17, HQ19, HQ19T, HQ21, HQ22T with Curt part 52041 and 52044 replacement

AFFECTED TRAILER MODELS

C12, C13, C15, HQ12, HQ15, HQ17, HQ19, HQ19T, HQ21, HQ22T with non-sequential VIN
4B9B1AB10KA165230 to 4B9B1AD2XMA165616

REASON FOR THIS SAFETY RECALL

When the emergency breakaway system pin is pulled and not replaced the electrical circuit is closed. When the small breakaway battery (CURT) is depleted, the emergency brake system draws through the charger from the main battery. The total assumed draw is around 10amps - 12 amps. The charger is rated around 5amps. This causes an overload which could lead to a fire.

SERVICE ACTION

Black Series Camper Inc. will supply the updated components. **BSC** will pay/reimburse for the labor of the replacement and **BSC** will reimburse the value of the part and the labor if the component has been replaced. The remedy is to be provided free of charge to the customer.

REMINDER: It is a violation of Federal law for a dealer to deliver a new motor vehicle or trailer to a customer under a sale or lease until the defect or noncompliance is remedied.
