Dear valued Lamborghini Sales and Service Manager,

In the course of continuous product monitoring and internal tests, Automobili Lamborghini S.p.A. has determined that a non-compliance that relates to motor vehicle safety exists in certain 2018-2021 Lamborghini Huracan.

On the affected vehicles were manufactured with a software bug within the infotainment system which when subjected to temperatures below 41 degrees Fahrenheit and after a long sleep may sometimes generate a fault that renders the rear view (back-up) camera inoperable until the next power latch. When reverse gear is selected the rear camera view may go blank screen with a pop up message stating that the rear view camera is not available.

Accordingly, these vehicles do not comply with the requirements of Federal Motor Vehicle Safety Standard (FMVSS) number 111, "Rear view Mirrors." If the full camera view is blank and the driver does not check their surroundings before reversing, there may be an increased risk of a crash.

For the reasons listed above, Automobili Lamborghini decided to launch a non-compliance recall campaign to rework the involved cars. The repair instructions are now be available on the HUB section "Service and Recall Campaigns" as well as on LIASS.

In order to further support you in answering questions to your customers, we are attaching the FAQ (Frequent Asked Question) you must follow.
