## AMB3 Recall campaign - Replacing seat occupancy detection system for passenger seat

## Overview

Due to an incorrect parts list, the affected vehicles were fitted with a passenger seat variant that is not approved for the relevant market.

As a result, it is possible that the electrical signal in the passenger seat is insufficient to correctly recognize certain occupants in the passenger seat. In some cases, this may interrupt the triggering of the restraint systems on the passenger side. This is alerted to the driver

by an airbag warning light or "Passenger Airbag OFF" light which is activated.

Therefore, the components for the seat occupancy detection system in the passenger seat must be replaced.

Within the market area for which you are responsible, please arrange for this measure to be carried out on the affected vehicles immediately.

<b>Model type</b>	911 Carrera (992)
<b>Model year</b>	2021
<b>Number</b>	142
