Issue: During rework at the factory, the airbag control module fixation holes were enlarged in order to allow correct assembly to the vehicle body. Because of this, the airbag may not deploy correctly in a crash, or may deploy unintendedly while driving, leading to an increased risk of injury.

Precautions: If there is an issue with the airbag control module, the airbag malfunction indicator lamp will illuminate. Owners are advised to contact an authorized dealer without delay to have the vehicle inspected if the airbag lamp illuminates, and also to ensure they are familiar with the airbag system information in the owner's manual.

Repair:

- REPAIR NOT YET AVAILABLE
