Subject: N212345945 - Safety Recall

High Voltage Battery May Melt or Burn (GM Owned Vehicles)

Final Remedy for GM Owned

Models: 2020 – 2022 Chevrolet Bolt EV

2022 Chevrolet Bolt EUV

To: All General Motors Dealers

General Motors is releasing Safety Recall N212345945 today. Please see the attached bulletin for details.

Vehicles involved in this recall were placed on stop delivery August 20, 2021 under recall N212345940 and are currently GM owned.

- Select 2020 - 2022 model year Chevrolet Bolt EV and Bolt EUV's will now be closed in N212345940 and moved to "Open" status in N212345945 to receive a final remedy of a new advanced diagnostic software.
- Please verify a VIN's involvement in this field action by checking in IVH. IVH is the best source for individual VIN inquiries.

This new advanced diagnostic software will continually monitor the high voltage battery in the vehicle.

- The software will initially limit the vehicle's high voltage battery to a maximum state-of-charge of 80%.
- Dealers will place the Notice to Customer (included in the bulletin) with the approximate miles of when the battery will automatically return to a maximum state-of-charge of 100% in the glove compartment.
- If no anomalies are detected after approximately 6,200 miles or 10,000 km of use, the high voltage battery will automatically return to a maximum state-of-charge of 100% without a return trip to the dealer.
- If the software detects a problem in the vehicle's high voltage battery, the customer will be alerted via a warning in the driver information center. If this occurs, the customer should contact their Chevrolet Bolt EV/EUV certified dealer to have the affected high voltage battery module replaced.

Once the service procedure contained in the bulletin has been performed on the vehicle this safety recall will close.

This field action must only be completed by Chevrolet EV certified dealers who have met all Bolt field action-specific training, tool and equipment requirements, and repairs must be performed by a technician who has successfully completed the required training.

**Frequently Asked Questions Document (FAQs)**

Attached to this message you will find a document that addresses the most likely questions customers may have regarding this Safety Recall. Please use this information as an aid to confidently answer customer concerns.

Global Warranty Management (GWM)

The Required Field Action section on the Investigate Vehicle History (IVH) screen will be updated June 13, 2023. A Stock VIN list is not included as our records show there are no vehicles in dealer new inventory.
