

New Safety Recall Advanced Communication – Y10

FCA US LLC (FCA US) has announced a safety recall on certain 2020 Model Year (JL) Jeep® Wrangler vehicles equipped with a 2.0L engine (sales codes EC1 and EC3).

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a cracked fuel supply line connector which may leak gasoline into the engine compartment. Uncontained gasoline in the engine compartment can result in a vehicle fire which increases the risk of injury to occupants and persons outside the vehicle, as well as property damage.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles to inspect and replace the fuel supply line as needed. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2021.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
