## **New Safety Recall Advanced Communication – Y73**

FCA US LLC (FCA US) has announced a safety recall on certain 2021 Model Year (WD) Dodge Durango vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with a rear spoiler that is over-flush to the roof, allowing contact to the roof when cycling the liftgate. Vehicle occupants may hear the spoiler hitting the body when opening or closing the liftgate, or a rattle from the spoiler being loose while driving. An over-flush rear spoiler may become damaged when cycling the liftgate which may result in the spoiler becoming partially detached from the vehicle. Rear spoilers that become partially detached may separate from the vehicle while driving, potentially creating a road hazard to operators and occupants of other vehicles, and can cause such vehicles to crash without prior warning.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to inspect and, if necessary, replace the rear spoiler. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2021.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
