

New Safety Recall Advanced Communication – Y91

FCA US LLC (FCA US) has announced a safety recall on certain 2020 and 2021 Model Year (GU) Alfa Romeo Stelvio and (GA) Alfa Romeo Giulia vehicles.

VINs identified as being involved in this campaign are currently live and searchable.
Stop sale is in effect for the above-identified vehicles.

Vehicles impacted by a stop sale are eligible for reimbursement allowance through the Recall Floorplan Reimbursement Policy (RFPRP), which can be requested upon recall claim submission.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been equipped with a fuel line sensor housing that may crack and leak fuel. The fuel line sensor fuel leak may cause fuel starvation of the engine. Fuel starvation may result in an unexpected loss of motive power, which can cause a vehicle crash without prior warning. In rare circumstances, if the leaked fuel comes in contact with an ignition source, a fire could occur. A vehicle fire can result in increased risk of occupant injury and/or injury to persons outside the vehicle, as well as property damage.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to inspect the fuel line sensor housing, and replace if needed. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2022.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
