

# RECALL Y78 - PARTS ORDERING ISSUES

Mopar is aware of issues surrounding the ordering of parts for Y78 and is actively working to resolve these issues:

- Requirement to provide an engine serial number
- Message - "Y78 Recall does not match for the VIN"

Further communication will be provided on the resolution of these issues.

Reminder:

The high pressure fuel pump is VIN specific due to the coordination of the software flash update required.

**DO NOT USE** a high pressure fuel pump that is not associated to the correct VIN.

If a high pressure fuel pump is installed in the incorrect VIN, acquire the truck and contact STAR for assistance.

Thank you,

Mopar
