Dear valued Lamborghini Sales and Service Manager,

In the course of continuous product monitoring and internal tests, Automobili Lamborghini S.p.A. has determined that a defect that relates to motor vehicle safety exists in certain 2021 Lamborghini Aventador.

On some of the affected vehicles, the screws on the connection of the heat exchanger oil lines may not have been properly torqued during the assembly process. Confirmation of the correct mounting of the assembly cannot be ensured. Should the mounting assembly not meet the torque specification, the heat exchanger oil lines could detach, and leak oil, which could potentially contact hot components increasing the risk of a fire.

For the reasons listed above, in a precautionary manner, Automobili Lamborghini decided to launch a recall campaign to rework the involved cars. The repair instructions are now be available on the HUB section "Service and Recall Campaigns" as well as on LIASS.

In order to further support you in answering questions to your customers, we are attaching the FAQ (Frequent Asked Question) you must follow. Since these activities are extremely important, we are confident you will make every effort to ensure that the vehicles are repaired in the shortest time possible.
