- ✓ Warranty Administrator
 - ✓ Technicians

Date: January 27, 2022

Issue: A retaining ring on top of the suspension strut could come loose due to a potentially insufficient notch. If the retaining ring on top of the suspension strut gets loose, the air within the pneumatic spring will be released, leading to a loss of ride comfort accompanied by a drop in ride height on the affected suspension strut. Vehicle handling capabilities could be affected, increasing the risk of a crash.

Precautions If this condition is present in the vehicle, a warning message, along with a red warning light, will be displayed indicating an air suspension malfunction. If this happens, customers should contact an authorized Audi dealer without delay and make arrangements to have the vehicle inspected/repaired.

- Repair:**
- REPAIR AVAILABLE – January 28, 2022 - Inspect and, if necessary, replace the affected suspension strut.
 - See ELSA/ServiceNet for complete repair & claiming instructions
 - Check daily campaign open inventory report or OMD for affected vehicles in inventory
 - Repair every affected inventory vehicle before delivery to consumers.

Parts Department: Parts will be managed by Free Order. Please see the campaign circular for complete details.

IMPORTANT REMINDER: VEHICLES AFFECTED BY SAFETY & COMPLIANCE RECALLS

New Vehicles in Dealer Inventory: It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied. By law, dealers must correct, prior to delivery for sale or lease, any vehicle that fails to comply with an applicable Federal Motor Vehicle Safety Standard or that contains a defect relating to motor vehicle safety.

Pre-Owned Vehicles in Dealer Inventory: Dealers should not deliver any pre-owned vehicles in their inventory which are involved in a safety or compliance recall until the defect has been remedied.
