SAFETY RECALL NOTICE: 21V960

TO: Affected KME Dealers

KME decided that a defect which relates to motor vehicle safety exists in certain model year 2012-2022 KME vehicles manufactured from April 2019 through October 2021.

Vehicles included in this recall have engine fuel tubes between the fuel rail and the injector for cylinders 4, 5, and 6 that may be susceptible to cracking, resulting in a high-pressure fuel leak. A high-pressure fuel leak in the presence of an ignition source may increase the risk of a fire. Fuel leaks may be detected during maintenance. An operator may smell fuel or observe a mist due to the fuel leak.

Owners will be directed to contact their local Cummins Service Center to have their vehicle(s) remedied.

Please be reminded that it is a violation of Federal law for you deliver a new motor vehicle or any new or used item of motor vehicle equipment covered by this notification until this defect has been remedied. Substantial civil penalties apply to violations of this law.

Your assistance with this recall is appreciated. Should you have any questions or concerns, please contact KME Customer Service at (570) 669-5230.

Sincerely,

KME, Inc.
