WHY DOES MY VEHICLE NEED REPAIRS?

FCA records indicate that you may have purchased a MOPAR high pressure fuel pump (HPFP) or engine assembly with an installed HPFP for your vehicle ^[1]. Some HPFPs could fail prematurely. A high pressure fuel pump failure may introduce internally failed component debris into the fuel system potentially causing fuel starvation if installed into a vehicle. Vehicle occupants may notice a Malfunction Indicator Lamp illuminating, a fuel leak, abnormal engine noise, or a change in drive quality. **Fuel starvation may result in an unexpected loss of motive power, which can increase the risk of a vehicle crash without prior warning.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

If you purchased an HPFP, or a remanufactured engine with an HPFP on it and have not yet installed it, FCA will reimburse your purchase with the return of the HPFP or remanufactured engine assembly.

If the recalled HPFP or remanufactured engine assembly with part number listed above has been installed in to a vehicle, the repair will be covered under recall Y78.

Please bring your HPFP or remanufactured engine assembly, and this letter with you to your dealership.
