- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

Takata has determined that a defect exists in the passenger-side frontal airbag inflator in your vehicle. The determination was made that the propellant in this inflator may degrade after long-term exposure to high humidity and temperature cycling, which could cause the inflator to explode during a deployment. An inflator rupture may cause metal fragments to pass through the airbag and into the vehicle interior at high speed, which may result in serious injury or death to passengers.

What will we do?

Your GM dealer will replace the passenger-side frontal airbag inflator in your vehicle. This service will be performed for you at no charge. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual inspection and service correction time of approximately one hour.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.
