Dear

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect which relates to motor vehicle safety exists in your vehicle, with the VIN shown above. Hyundai is conducting a safety recall in the United States to address a condition with Anti-Lock Brake System (“ABS”) modules in certain model year 2015 – 2016 Hyundai Genesis vehicles produced for sale in the U.S. market.

What is the problem?

The subject vehicles are equipped with Anti-Lock Brake System (“ABS”) modules that could malfunction internally and cause an electrical short, potentially resulting in an engine compartment fire. An electrical short could result in significant overcurrent in the ABS module increasing the risk of an engine compartment fire while parked or driving.

What will Hyundai do?

Your Hyundai dealer will install replacement ABS module fuses in your Hyundai vehicle. This procedure will be performed at **NO CHARGE** to you.

What should you do?

Please contact your nearest Hyundai dealer to schedule the recall repair as soon as possible.

The actual time required to perform the repair will take less than one hour, however your vehicle may be needed longer. Therefore, we recommend scheduling a service appointment to minimize inconvenience. If the Malfunction Indicator Light is illuminated in your vehicle, you should seek service at your Hyundai dealer as soon as possible.

You can continue driving your vehicle; however Hyundai recommends parking your vehicle outside and away from structures until the recall remedy is completed.
