We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

Reason for this recall

It has been decided that the vehicles in the recall population have a spare tire mounted on the rear of the unit that impedes the view of the left taillight. Under certain conditions during travel, the left taillight may not be visible and may lead to an increased risk of vehicle crash.

What we will do

The remedy is to remove the spare tire bracket and flip 180 degrees, moving the tire down approximately 5 inches. The service and parts required for this corrective action will be provided at no charge to you.

What we need you to do

Customers can remove the spare tire from the carrier until the remedy can be completed. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 1 hour. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.

If you have questions
