Dear Ms. [REDACTED],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner of a vehicle affected by this action.

#### **What is the issue?**

There is a possibility that lock nuts on the rear axle trailing arms may break due to stress corrosion. A broken lock nut may misalign the rear axle, causing a loss of control and increasing the risk of a crash.

#### **What will Porsche do?**

Porsche is conducting a safety recall to replace the affected lock nuts. Repairs will be performed free of charge.

#### **What should you do?**

The necessary remedy parts are now available. Please contact any authorized Porsche dealer to schedule an appointment to have this recall performed as soon as possible and to arrange for Porsche-provided alternate transportation, if necessary.

**In the meantime, if you specifically notice that your steering wheel is out of alignment, your vehicle is pulling to one side, or if you hear distinctive noises coming from the rear axle area, please park the vehicle and immediately contact any authorized Porsche dealer to schedule an appointment.**
