NHTSA Campaign I.D. Number: 21V-315

Dealer Bulletin: SRV-RCL-21-008

Dear Ducati Owner,

This notice is sent to you in accordance with the requirements of the U.S. National Traffic and Motor Vehicle Safety Act. Ducati Motor Holding S.P.A. has decided that a defect which relates to motor vehicle safety exists in certain Monster 1200 MY 2017-2020 all versions (USA and CAN only). Our records indicate that you are the owner of a Ducati motorcycle affected by this safety recall campaign. Please take the time to read this letter and help us take the appropriate steps to ensure that your vehicle is operating properly.

What is wrong?

It has been determined that due to brake system architecture, there is a potential for greater susceptibility for air permeation through the rear brake hoses into the rear brake system, reducing rear brake effectiveness. If this issue develops during normal use, it develops gradually, providing sufficient warning to the operator that rear braking performance may be degrading. If this issue develops after long periods of time without using the motorcycle, the rider during the pre-ride check (as recommended in the Owner’s manual) would be warned by an increase of the rear brake pedal stroke. If this condition remains undetected, a rider who relies on rear braking may experience extended stopping distances, increasing the risk of a crash.

The front and rear brake system for this motorcycle are hydraulically independent; therefore, performance of the front brake, which provides full stopping ability, is NOT affected by the rear brake system.

What will Ducati do?

We are informing you of this Non-Compliance Recall on your Ducati motorcycle although we are not able to perform the remedy currently. **We will notify you with a follow-up letter as soon as the part is available.**
