Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2020-2021 E-Class, S-Class, GLC-Class, CLS-Class, AMG GT 4-doors coupe and G-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the CONCERN?

In certain MY20-21 E-Class, S-Class, GLC-Class, CLS-Class, AMG GT 4-doors coupe and G-Class vehicles, the locking mechanism for the electrical connector on the side impact crash sensors might not meet current production specifications. In this case, the side impact crash sensor connector might loosen over time. In the event of a crash with a side impact, the activation of the air bags and seat belts might be delayed, potentially resulting in a reduced restraint performance, which could increase the risk of injury. When the issue occurs, a specific warning message is displayed and the SRS warning lamp is illuminated in the instrument cluster.

What will your DEALER DO?

An authorized Mercedes-Benz dealer will check the side impact crash sensors in the doors on the affected vehicles and replace them, if necessary. **This service will be provided free of charge.** We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be less than 3 hours, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures that might be applicable to your vehicle which may increase the required working time.
