Subject: Safety Recall 97FR -Engine Compartment Fuse Box Relays

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2021 model year Volkswagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue? Relays in the engine compartment fuse box may have been pre-damaged. Damage to the relay may cause a reduced clearance between the electrical contacts of the relay potentially causing inadvertent electrical contact within the relay and unintended operation of the vehicle components, in this case the vehicle horn and/or the engine starter. A starter and/or horn which activates by itself, and is not detected by the customer, may present a risk of fire due to overheating during extended operation.

What will we do? To correct this defect, your authorized Volkswagen dealer will inspect and, if necessary, replace the affected relay(s). This work will take about an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do? Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. To set up an appointment online, please visit www.vw.com/find-a-dealer.

Precautions you should take If this condition is present in the vehicle, the horn may activate by itself and may sound continuously.

Lease vehicles and address changes If you are the lessor and registered owner of the vehicle identified in this action, the law requires you to forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please fill out the enclosed prepaid Owner Reply card and mail it to us so we can update our records.
