# IMPORTANT SAFETY RECALL

## High Pressure Fuel Pump

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US has decided that a defect, which relates to motor vehicle safety, exists in certain [2019 through 2020 Model Year (D2) Ram 3500 Pickup, (DD) Ram 3500 Cab Chassis, (DJ) Ram 2500 Pickup and (DP) Ram 4500/5500 Cab Chassis] vehicles.

### RECALL DESCRIPTION

The High Pressure Fuel Pump (HPFP) on your vehicle <sup>[1]</sup> may fail prematurely. An HPFP failure may introduce internally failed component debris into the fuel system potentially causing fuel starvation. Vehicle occupants may notice a Malfunction Indicator Lamp illuminating, a fuel leak, abnormal engine noise, or a change in drive quality. **Fuel starvation may result in an unexpected loss of motive power, which can increase the risk of a vehicle crash without prior warning.**

### YOUR VEHICLE HAS ALREADY BEEN REMEDIED

According to our service records, the HPFP has already been replaced on your vehicle. Therefore, your vehicle has been remedied and this safety recall does not need to be performed.

**This notification is provided for your records only. There is nothing more that you need to do.**
