IMPORTANT SAFETY RECALL NOTICE: 21V960

IMPORTANT SAFETY RECALL

This notice applies to your vehicle(s): «VIN»

Dear KME Vehicle Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Why is a recall being conducted?

KME decided that a defect which relates to motor vehicle safety exists in certain model year 2012-2022 KME vehicles manufactured from April 2019 through October 2021.

Vehicles included in this recall have engine fuel tubes between the fuel rail and the injector for cylinders 4, 5, and 6 that may be susceptible to cracking, resulting in a high-pressure fuel leak.

A high-pressure fuel leak in the presence of an ignition source may increase the risk of a fire. Fuel leaks may be detected during maintenance. An operator may smell fuel or observe a mist due to the fuel leak.

What are we doing about the problem?

Vehicles subject to this recall are to be inspected and repaired by a Cummins certified dealer or technician. The subject fuel tubes for cylinders 4, 5 and 6 will be replaced with new fuel tubes and vibration isolators will be added to the fuel tubes. There is no cost to owners for this remedy. The estimated repair time will be 2 hours.

What should you do?

Please contact your local Cummins Service Center to perform the remedy. You may contact Cummins customer service at (800) 286-6467.
