Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2016-2020 CLA-Class, GLA-Class, GLE/GLS-Class, A-Class, C-Class, E-Class, S-Class, SL-Class, E-Class Coupe/Convertible, GLB-Class, GLC-Class, CLS-Class, AMG GT 4-doors Coupe and G-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the CONCERN?

In certain vehicle models mentioned above with a gasoline engine, a leak may develop between the fuel rail and fuel injector due to trapped debris from the production process, which could affect the safety and emissions of the vehicle. Trapped debris might damage the seal between the fuel rail and fuel injector, which over the life of the vehicle might result in a fuel leak into the engine compartment. Leaking fuel from this area might contact hot parts of the engine which could increase the risk of a fire. This may also result in the illumination of a Malfunction Indicator Lamp ("MIL") if the fuel rail pressure deviation exceeds the operating thresholds. Vehicle occupants may also experience a fuel odor.

What will your DEALER DO?

An authorized Mercedes-Benz dealer will replace the fuel rail and the fuel injectors on the affected vehicles. **This service will be provided free of charge.** We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the repair time may be between **2-6 hours** depending on model your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of the normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.
