Reference Bulletins: QB 10111

Volvo Car USA LLC and Volvo Car Canada LTD on behalf of Volvo Car Group, have decided to launch Recall R10111 on certain model year 2021-2022 V90, V90CC, S60, V60, V60CC, XC40, XC60 and XC90 vehicles.

Volvo Cars investigations have identified that there may be a risk that certain seat belts with the Automatic Locking Retractor (ALR) have not been produced according to specifications and may result in early deactivation of the locking feature used to tightly secure a child restraint system/seat.

The subject seat belt assemblies have a feature that converts the retractor from an emergency locking retractor (ELR) to an automatic locking retractor. The seat belts convert to the ALR mode after the webbing has been fully withdrawn from the retractor. The system is designed so that as the seat belt is released into the retractor, the ALR function remains active so a child restraint seat can be tightly secured. However, in certain seat belt assemblies the ALR function deactivates early before the webbing is fully retracted.

This noncompliance does not impact the compliance or functionality of the seat belt assemblies with respect to their normal use by adult passengers or use of the LATCH system to secure child restraint seats.

While using child restraint seats, which the vehicle owner elects to use the seat belt to secure the child restraint seat instead of the LATCH system, if the seat belt is not lockable, there is an increased risk of injury in a crash to the occupant of the child restraint seat.

To remedy the concerned vehicles, Volvo Cars needs to inspect and perform a functionality test. If necessary, the affected seat belts will be replaced with a seat belt assembly that contains ALR levers that were manufactured according to production specifications.

We **STRONGLY RECOMMEND** you **DO NOT ORDER** replacement parts until the vehicle has been inspected and failure has been confirmed. Due to very low predicted failure rate and parts availability, as well as multiple part numbers dependent on Model, Model Year, Seat Belt Color and Seat Belt Position, **DO NOT ORDER** any parts before the confirmed faulty ALR.

SEAT BELT RETRACTORS THAT FAIL THE FUNCTIONALITY TEST AND ARE CLAIMED AS SUCH, WILL BE REQUESTED BY TMA FOR TESTING/ANALYSIS AND VALIDATION. UNNECESSARY REPLACEMENTS WILL BE DEBITED.
