What you need to know

CONDITION Your 2011 Venza has a sensor in the driver-side front door that is connected to the airbag system control unit by electrical wires. One of these wires can fracture over time. If this occurs, the airbag warning lamp could illuminate and the sensor in the door could become inoperable. **This may prevent the side airbag and curtain shield airbag on the driver side from deploying in certain types of collisions, increasing the risk of injury in the event of a crash where those airbags are needed.**

REMEDY Any authorized Toyota dealer will inspect the driver-side front door wire harness and, if necessary, replace it with an improved one **FREE OF CHARGE**.

DURATION The remedy will take approximately one and a half hours if the wire harness needs to be replaced. However, depending on the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

If you are not the current owner of the vehicle, [click here](#) to update your records.

EVITA PONER EN PELIGRO A TUS SERES QUERIDOS

CONDICIÓN Tu Venza 2011 tiene un sensor en la puerta delantera del lado del conductor que está conectado a la unidad de control del sistema de bolsas de aire mediante cables eléctricos. Uno de estos cables puede fracturarse con el tiempo. Si esto ocurre, la luz de advertencia de la bolsa de aire podría encenderse y el sensor en la puerta podría dejar de funcionar. **Esto pudiera evitar que la**

bolsa de aire lateral y la bolsa de aire tipo cortina del lado del conductor se desplieguen en ciertos tipos de colisiones, lo que aumentaría el riesgo de lesiones en caso de un choque en el que se necesiten esas bolsas de aire.

LLAMA AL 1-909-515-8402 PARA PROGRAMAR TU REPARACIÓN GRATUITA.
