We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided that the vehicles in the recall population may have 120VAC wiring connectors for the slide room circuit that can get wet and stay wet for extended periods of time due to the way they are mounted. Wet electrical connections, can increase the risk of a fire.

***What we
need you to
do***

In wet climates, or after driving in rain, turn off the power circuits that are in the slide room on the Off Door Side of the unit until the self-contained power connector can be inspected by a dealer. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 1 hour.
