Dear Valued Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Jayco has decided that a defect which relates to motor vehicle safety exists in certain 2021 Jay Feather, 2021-2022 Jay Flight SLX, 2021-2022 Autumn Ridge Outfitter and 2021 Open Range travel trailers.

This is a follow up to a previous letter we mailed in November 2021 regarding this recall. Our records show that this recall has not been completed on your vehicle.

***Reason for this recall***

The flame on the cooktop will invert when the furnace is running. The cooktop is installed in a cabinet that is not sealed from the furnace area. When the furnace and the cooktop are operated at the same time the cooktop burner flame can invert leading to an increased risk of personal injury or fire.

***Recall Remedy***

Remedy consists of adding sealant and plywood panels to seal the area around the gas line hose and the area adjoining the cooktop. The remedy will be performed free of charge to you and will take approximately 45 minutes to complete.

***What we need you to do***

Please contact a Jayco certified repair facility and schedule an appointment for this remedy. **CAUTION:** Do not use the cooktop and the furnace at the same time until the remedy is completed.
