Dear General Motors Customer:

As a result, GM is conducting a safety recall. We apologize for this inconvenience.

## IMPORTANT

- Your vehicle is involved in GM recall N212328780.

### Why is your vehicle being recalled?

Takata has determined that a defect exists in the passenger-side frontal airbag inflator in your vehicle. The determination was made that the propellant in this inflator may degrade after long-term exposure to high humidity and temperature cycling, which could cause the inflator to explode during a deployment. An inflator rupture may cause metal fragments to pass through the airbag and into the vehicle interior at high speed, which may result in serious injury or death to passengers.

### What will we do?

**Parts to repair your vehicle are not currently available**, but when parts are available, your GM dealer will replace the passenger-side frontal airbag inflator in your vehicle. This service will be performed for you at no charge. We are working as quickly as possible to correct this condition.

When parts are available, we will send you another letter asking you to take your vehicle to your GM dealer to have your vehicle serviced. You can also check the status of this recall at: <https://my.gm.com/recalls>.
