Details of the Recall

The recall number is Y03 and is for the clutch hardware. In some circumstances, the clutch pressure plate on your vehicle may become overheated through friction, which may lead the pressure plate to rapidly fracture. This clutch defect may look similar to a previous clutch defect you were contacted about. This recall supersedes the previous W12 recall. Your vehicle will need to have this safety recall completed as soon as possible.

Your dealer will install a protective hose sleeve, reroute a wire harness, reprogram the powertrain control module and the instrument cluster panel.

How do I schedule my **FREE** repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
