BY E-MAIL 7/26/2021

Dear Choon:

This letter is in response to the questions raised during the review of recall 21V-293 on July 26, 2021 regarding the defect in certain 2019-2020 Mack LR vehicles in which the steering transfer case may have an insufficient amount of oil.

Q: Did Curtis Machine Company Inc., sell this recalled equipment or similarly defective equipment to more than one purchaser?

A: NO. This unit is made special for Mack Truck. We believe 8 units built on 11/6/2018 may have not been lubricated.

John Curtis, President
