Locate the generator.

1

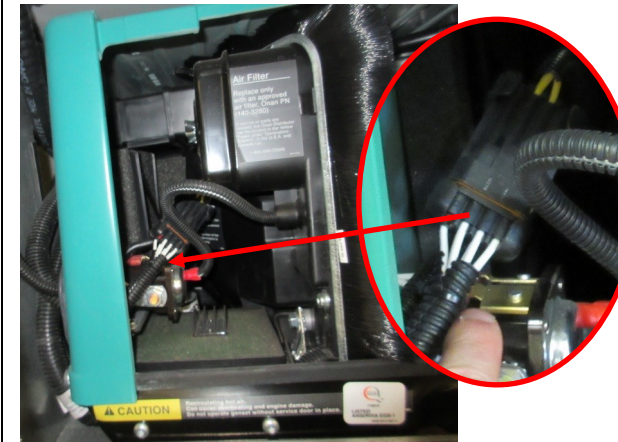

00:00:00

Remove the access door.

2

00:00:00

Locate the AGS harness plug on the left hand side of the generator.

3

00:00:00

Bundle the extra length of wire in the harness with the two nylon ties. (shown here in white for visibility, these will be black in the repair kit.)

4

00:00:00

With the black nylon tie straps.

5

00:00:00

Replace and latch generator access door.
