## What you need to know

**CONDITION** According to BMW, which makes the current generation Supra for Toyota, your 2021 Supra has been equipped with an engine management software that, under certain specific engine start conditions, could damage a component that provides braking power assistance. **In this condition, there could be a loss in the brake assist and an increase in stopping distance. This can lead to an increased risk of a crash.**

**REMEDY** Any authorized Toyota dealer will update the engine control unit (ECU) **FREE OF CHARGE** to you.

**NOTE:** You may have previously received a notice from Toyota about a software update for your vehicle for Toyota Safety Recall designation 19TA19 (NHTSA Recall No. 19V-684). Even if you had that update performed by your dealer, you also need to have this update made in order to remedy the condition in this important Safety Recall. If you have not previously received the software update for recall 19TA19, this update will also remedy the condition for 19TA19.

**DURATION** The remedy should take approximately one to three hours. However, depending on the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

If you are not the current owner of the vehicle, [click here](#) to update your records.

**EVITA PONER EN PELIGRO A TUS SERES  
QUERIDOS Y A TI MISMO.**

**CONDICIÓN** Según BMW, que fabrica la generación actual de Supra para Toyota, tu Supra 2021 ha sido equipado con un programa de administración del motor que, bajo ciertas condiciones específicas de encendido de motor, podría dañar un componente que proporciona asistencia para la potencia de frenado. **Bajo esta condición, podría haber una pérdida en la asistencia de frenado y un aumento en la distancia para detenerse. Esto puede causar un aumento del riesgo de un choque.**

**LLAMA AL 1-303-443-3250 PARA PROGRAMAR TU REPARACIÓN GRATUITA.**
