The information contained in this report was submitted pursuant to 49 CFR §573

### Manufacturer Information:
- **Manufacturer Name:** Chrysler (FCA US, LLC)
- **Address:** 800 Chrysler Drive, CIMS 482-00-91 Auburn Hills MI 48326-2757
- **Company phone:** 1-800-853-1403

### Population:
- **Number of potentially involved:** 16,741
- **Estimated percentage with defect:** 100%

### Vehicle Information:
- **Vehicle 1:** 2017-2018 Chrysler Pacifica
- **Vehicle Type:** VAN
- **Power Train:** NR
- **Descriptive Information:** Some 2017-2018 MY Chrysler Pacifica Plug-In Hybrid Electric Vehicles ("PHEVs") have experienced fires that may have originated at the center of the vehicle underbody where the high voltage ("HV") battery pack assembly is located. The defect has not yet been identified and the root cause of these fires is still being investigated.

  The potentially affected vehicle production period began on August 12, 2016, when production of Chrysler Pacifica PHEVs began, and ended on August 7, 2018, when 2018 MY production ended. The suspect population was determined using vehicle manufacturing records.

  Similar vehicles not included in this recall are not PHEVs, or were built after the suspect vehicle production period.

- **Production Dates:** AUG 12, 2016 - AUG 07, 2018
- **VIN Range 1:** Begin: NR, End: NR, Not sequential

### Description of Defect:
- **Description of the Defect:** A vehicle may experience a fire potentially originating in the center of the vehicle underbody with the ignition in the "OFF" mode.

- **FMVSS 1:** NR
- **FMVSS 2:** NR
**Description of the Safety Risk:** A vehicle fire can result in increased risk of occupant injury and/or injury to persons outside the vehicle, as well as property damage.

**Description of the Cause:** NR

**Identification of Any Warning that can Occur:** None

**Supplier Identification:**

**Component Manufacturer**

- **Name:** LG Energy Solutions Michigan, Inc.
- **Address:** 1 LG Way
  Holland Michigan 49423
- **Country:** United States

**Chronology:**

- On August 31, 2021, the FCA US LLC ("FCA US") Technical Safety and Regulatory Compliance organization opened an investigation as a result of detecting a potential trend in fires in certain Chrysler Pacifica PHEVs.

- From September 2021, to January 2022, FCA US repurchased two vehicles for origin and cause investigation. The cause of these fires is under investigation.

- As of February 4, 2022, FCA US is aware of ten additional fires. The cause of these fires is under investigation.

- As of February 4, 2022, FCA US has identified five customer records, zero warranty claims, and 12 field reports potentially relating to this issue for all markets with dates of receipt ranging from April 23, 2019, to December 14, 2021.

- As of February 4, 2022, FCA US is not aware of any accidents or injuries potentially relating to this issue for all
markets.

• On February 6, 2022, FCA US determined, through the Vehicle Regulations Committee, to conduct a voluntary safety recall of the affected vehicles.

• As of February 21, 2022, FCA US has not made a determination of whether the HV battery pack assembly is defective and/or the root cause of these fires.

Description of Remedy:

| Description of Remedy Program | FCA US will conduct a voluntary safety recall on all affected vehicles to update the High Voltage Battery Pack Control Module ("BPCM") software to monitor battery pack assembly operational status for conditions that could lead to a fire in the battery pack assembly. FCA US will inspect and, if necessary, replace the battery pack assembly. Until the remedy is complete, the Company is advising owners of these hybrid vehicles to refrain from recharging them, and to park them away from structures and other vehicles. |
| How Remedy Component Differs from Recalled Component | Remedy is updated BPCM software to monitor battery pack assembly operational status for conditions that could lead to a fire in the battery pack assembly. FCA US will inspect and, if necessary, replace the battery pack assembly. Root cause is unknown. |
| Identify How/When Recall Condition was Corrected in Production | NR |

Recall Schedule:

| Description of Recall Schedule | **09/22/2022: FCA US will notify dealers and begin mailing Final Owner Letters on or about 10/11/2022. |
| Planned Dealer Notification Date | APR 02, 2022 - APR 02, 2022 |
| Planned Owner Notification Date | APR 02, 2022 - APR 02, 2022 |

* NR - Not Reported
