Description of the Cause : defective component received from supplier

Identification of Any Warning : in the event of a propane leak, the propane gas alarm would be activated that can Occur :

**Involved Components :**

Component Name : propane cook top

Component Description : adjustment valve

Component Part Number : NR

**Supplier Identification :****Component Manufacturer**

Name : NR

Address : NR

NR

Country : NR

**Chronology :**

on May 24 we received a mailed notice from Dometic of a recall on a specific list of cooktop serial numbers for some of the cooktops that they had supplied to us - We immediately searched our inventory to find what defective components we had in stock to sequestered them and then searched our QAR reports to identify vehicles that we had shipped with defective components in them

**Description of Remedy :**

Description of Remedy Program : Dometic is supplying replacement cooktops directly to our dealers so that they can replace the defective product on all effected vehicles in the field at no cost to the owner and dealers will be reimbursed for the installation by Dometic

How Remedy Component Differs from Recalled Component : there is no visually detectable difference

Identify How/When Recall Condition was Corrected in Production : all inventory was searched to identify defective components and the defective components were marked as defective and removed to our NCR area - all components in vehicles in production were inspected for matching serial numbers of defective components and if they were defective they were removed, marked and placed in the NCR area

**Recall Schedule :**

Description of Recall Schedule : NR

Planned Dealer Notification Date : NR - NR

Planned Owner Notification Date : NR - NR

**Purchaser Information :**

The following manufacturers purchased this defective/noncompliant equipment for possible use or installation in new motor vehicles or new items of motor vehicle equipment:
