Description of Defect :

Description of the Defect : The known assembly defect is specific to aluminum rims used in production between 9/15/2011 and 10/3/2017. The cause of this defect is improper assembly, specifically over-torque of the wheel spokes.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Possible consequence of this defect can include broken and/or split rims and possible failure resulting in wheel lock up or damage that could potentially

lead to vehicle crash.

Description of the Cause : NR

Identification of Any Warning
that can Occur : NR

Involved Components :

Component Name 1 : Wheel rim

Component Description : Front wheel rim (19")

Component Part Number : IMZ-8.1037-06117-01

Component Name 2 : Wheel rim

Component Description : Rear/sidecar/spare wheel rim (19")

Component Part Number : IMZ-8.1037-07117-01

Component Name 3 : Wheel rim

Component Description : Front wheel rim (18")

Component Part Number : IMZ-8.1239-06117-01

Component Name 4 : Wheel rim

Component Description : Rear/sidecar/spare wheel rim (18")

Component Part Number : IMZ-8.1239-07117-01

Chronology :

After being contacted by the NHTSA in regard to additional complaints of cracked and/or defective wheel rims we opened a full investigation into claim history and documented complaints that were outside the scope of our original recall. Upon review it was determined that a potential defect may exist for all wheel rims provided by our supplier ComStart and assembled between 9/15/2011 and 10/3/2017.

Description of Remedy :

Description of Remedy Program : The remedy program will involve the replacement of all wheel rims (including new spoke set, tube and rim strips) for all Ural sidecar motorcycles manufactured between 9/15/2011 and 10/3/2017. Repairs will be completed free of charge by an authorized Ural Dealer. Dealers will be reimbursed following the flat rate schedule requirements and at their published hourly shop rate. This recall excludes wheel rims previously replaced by warranty and/or under NHTSA Recall No. 13V-507.

How Remedy Component Differs from Recalled Component : Wheel rims have been provided by our new supplier Italcercchio S.R.L. and the assembly process is very closely monitored by IMZ factory. All components provided by Italcercchio S.R.L. have exceeded all quality inspection requirements.

Identify How/When Recall Condition was Corrected in Production : The recall condition was corrected during production by changing the assembly procedures and quality control inspections at PK IMZ factory. In addition, the supplier of aluminum wheel rims was changed starting with 2018 model year production.

Recall Schedule :

Description of Recall Schedule : Dealer notification letters will be initially emailed starting on 7/15/22 with all hard copies sent by USPS on or before 7/31/22.

Interim owner notification letters outlining the details of the recall will be mailed by USPS beginning on 8/1/2022 and completed on or before 8/15/2022.
