Recall Campaign Initial Notification			February 4, 2022
Campaign No. :	NHTSA ID	Campaign Desc. :	Replace Front Speed Sensor Wiring Harness
TBD	22V042	22P2197472	
<p>This is to notify you of a new Recall Campaign to replace the front speed sensor wiring harness on 171 Model Year (“MY”) 2021 Mercedes-AMG GT Black Series (190 platform) vehicles. The recall campaign will be visible on the www.safercar.gov website and may generate questions from customers. Affected VINs will be flagged in VMI as “PENDING” on February 4, 2022.</p>			
Background			
Issue	Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has determined that on certain Model Year (“MY”) 2021 Mercedes-AMG GT Black Series (190 platform) vehicles, the length of the wiring harness for the front wheel speed sensors might not meet current production specifications. In certain driving maneuvers such as maximum steering input or full compression/extension of the suspension, damage to the wheel speed sensor wiring harness could occur due to tensile loading. In this case, vehicle dynamic control system functions might be impaired, which could increase the risk of a crash.		
What We’re Doing	MBUSA will conduct a voluntary recall. An authorized Mercedes-Benz dealer will replace the wiring harness for the front wheel speed sensors on the affected vehicles.		
Parts	Remedy is not available at this time.
