Dear valued Lamborghini Sales and Service Manager,

In the course of continuous product monitoring and internal tests, Automobili Lamborghini S.p.A. has determined that a defect that relates to motor vehicle safety exists in certain 2020 & 2022 Huracan EVO and 2022 Huracan STO vehicles.

The gearbox may have an insufficient amount of transmission oil, due to a supplier mistake, which can result in clutch slippage. Clutch slippage can cause a loss of drive power and increase the risk of a crash. Also, in certain driving situations the transmission oil can foam and leak out of the gear vent. Leaked transmission oil in the presence of hot exhaust system parts can increase the risk of a fire.

For the reasons listed above, in a precautionary manner, Automobili Lamborghini decided to launch a worldwide recall campaign to rework the involved cars. The repair instructions are now available on the HUB section "Service and Recall Campaigns" as well as on LIASS.

In order to further support you in answering questions to your customers, we are attaching the FAQ (Frequent Asked Question) you must follow. Since these activities are extremely important, we are confident you will make every effort to ensure that the vehicles are repaired in the shortest time possible. For further information, please do not hesitate to contact your responsible Area Manager.

Yours sincerely,

Automobili Lamborghini S.p.A.
