## **New Safety Recall Advanced Communication – Z35**

FCA US LLC (FCA US) has announced a safety recall on certain 2022 Model Year (WL) Jeep® Grand Cherokee and Grand Cherokee L vehicles.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with a turn signal flash rate at the same flash rate designed to indicate a failed turn indicator and would not indicate a significant change in the flashing rate if/when there is a failure of one or more turn signal lamps. This could cause a crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 108 S9.3.6 which requires that "Failure of one or more turn signal lamps [...] must be indicated by the turn signal pilot indicator by [...] a significant change in the flashing rate".

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to update configuration parameters in the Body Control Module (BCM). The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in the 2nd Quarter of 2022.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
