## **New Safety Recall Advanced Communication – Z31**

FCA US LLC (FCA US) has announced a safety recall on certain 2021 Model Year (WD) Dodge Durango, 2021 Model Year Jeep® Grand Cherokee, and 2021 through 2022 Model Year (WL) Jeep® Grand Cherokee and Grand Cherokee L vehicles.

VINs identified as being involved in this campaign are currently live and searchable.  
**Stop sale is in effect for the above-identified vehicles.**

Vehicles impacted by a stop sale are eligible for reimbursement allowance through the Recall Floorplan Reimbursement Policy (RFPRP), which can be requested upon recall claim submission.

**IMPORTANT:** Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may have been built with an Exhaust Gas Recirculation (EGR) valve that may become stuck in the open position. An EGR valve that becomes stuck open may cause an unexpected loss of motive power during low load conditions. An unexpected loss of motive power can cause a vehicle crash without prior warning.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall to replace the EGR valve. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2022.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
