

New Safety Recall Advanced Communication – Z43

FCA US LLC (FCA US) has announced a safety recall on certain 2022 Model Year (JL) Jeep Wrangler vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a wiring harness that is incompatible with the tail lamp assembly, which results in nonfunctional side marker lamps within the tail lamp assembly. Vehicles with nonfunctional side marker lamps may cause an approaching vehicle to be unaware of the position and dimensions of the vehicle, which can cause a crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 108 Table 1-a which requires that side marker lamps shall be "steady burning." Vehicles that do not activate the side marker lamps when the vehicle lighting is activated are not steady burning.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to replace the tail lamp assemblies on all affected vehicles. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2022.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
