

New Safety Recall Advanced Communication – Z48

FCA US LLC (FCA US) has announced a safety recall on certain 2018 and 2019 Model Year (WK) Jeep® Grand Cherokee and (WD) Dodge Durango vehicles.

VINs identified as being involved in this campaign are currently live and searchable.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a Hydraulic Control Unit (HCU/ABS) Anti-lock Brake System module that falsely reads pressure in the primary circuit. An HCU/ABS module that falsely reads pressure in the primary circuit may illuminate the brake lights, as well as allows the vehicle to start and shift out of park without the brake pedal being depressed. This condition can result in unintended vehicle movement and cause a vehicle crash without prior warning and/or injury to others outside the vehicle.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles. The remedy for this condition is currently under development. Dealers will be notified when a remedy for this safety recall becomes available by way of established communication methods.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
