SAFETY RECALL 22TA06 (Interim Notice 22TB06)

****IMPORTANT UPDATE****

Certain 2023 Model Year bZ4X

***DO NOT DRIVE* – Potential Loss of Vehicle Control**

NHTSA Recall No. 22V-444

- The investigation into this concern has been concluded and a remedy has been developed.
- The remedy will involve replacing the wheels with improved ones and replacing the hub bolts with newly designed hub bolts with washers.
- A new Owner's Manual will also be provided with user information for the new hub bolts.
- Toyota is diligently working to prepare the parts needed to implement this remedy.
- The current estimate for remedy launch is Late October 2022 - Early November 2022.

Thank you for your cooperation.
