

New Safety Recall Advanced Communication – Z96

FCA US LLC (FCA US) has announced a safety recall on certain 2020 through 2022 Model Year (JL) Jeep® Wrangler, 2021 through 2022 Model Year (JT) Jeep® Gladiator and 2020 through 2022 Model Year (DT) Ram 1500 Pickup vehicles equipped with a 3.0L diesel engine.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles equipped with a 3.0L diesel engine may have been built with a high pressure fuel pump ("HPFP") that could fail prematurely. A HPFP failure may introduce internally failed component debris into the fuel system potentially causing fuel starvation. Fuel starvation may result in an unexpected loss of motive power, which can cause a vehicle crash without prior warning.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to replace the HPFP, and inspect and, if necessary, replace additional fuel system components. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
