

DTNA Aftermarket Parts Pricing FL958 FL966 Update effective October 11th 2023

10/13/2023 • Pricing

Daimler Trucks North America (DTNA) has released Phase I of the FL958 and FL966 SMV recalls; the supporting campaign kit is:

Part Number: 25-FL958-000
Description: KIT,FL958,ANODIZED SMV

DTNA is notifying the network of an adjustment made to the released kit pricing.

At issue: The FL958 and FL966 kits were priced incorrectly and have had a part price adjustment on 10/11/2023, which will affect the system price reflected in Paragon and the Online Warranty Link (OWL). The price reflected in Paragon and OWL will show less than the price paid for any orders before 10/11/2023, which were approximately 40 kits.

Effective 10/11/23 Pricing has been adjusted. Please update your business systems to reflect this change.

	Dealer Net	Wholesale	Fleet	List
US	\$59.60	\$94.99	\$106.99	\$130.99
Canada	\$79.98	\$127.48	\$143.58	\$175.79

Solution: For full recovery Dealers are instructed to file a **recall campaign preapproval claim** and adjust the claimed price to the amount paid; please also attach a copy of the PDC invoice.

Please direct inquiries via APC or email AM-STRAT-PR@daimlertruck.com.
