Date: December 16, 2022

Issue: The Safety Certification label (located on the B-pillar) does not have the required weight information/specifications printed on it. This makes the label noncompliant with regulatory requirements. Missing weight specifications can cause someone to overload the vehicle. Overloading a vehicle increases the risk of a crash.

- Repair:**
- REPAIR NOT YET AVAILABLE
 - Check daily campaign open inventory report or OMD for affected vehicles in inventory.
