Issue: A retaining ring on top of the suspension strut could come loose due to a potentially insufficient notch. If the retaining ring on top of the suspension strut becomes loose, the air within the pneumatic spring will be released, leading to a loss of ride comfort accompanied by a drop in ride height on the affected suspension strut. This can affect vehicle handling capabilities, increasing the risk of a crash..

Precautions If the recall condition is present in the vehicle, customers may see a warning message in the instrument panel, along with a red warning light, indicating an air suspension malfunction. Should this occur, customers are advised to contact an authorized Audi dealer without delay to have the vehicle inspected/repaired.
