Attention: Renegade Dealer _____

We have been notified by Manchester tank Inc. that the RegO service valve on recreational l.p. tanks have some short threads in the POL outlets. The short threads do not allow the POL connector to fully seat. This may result in a leak at the connection. The included safety bulletin from RegO outlines the issue, details how to check for the issue (time allotted 0.5 hrs.) and how to remedy the issue (time allotted 2.0 hrs.) at **NO CHARGE** to the end user, as quickly as possible.

As a Renegade dealer you can show this unit on your dealer lot, however, it cannot be sold or delivered to a retail customer until the remedy has been applied to the RegO service valve.
